136

QUARTERLY JOURNAL

OF THE

Royal Meteorological Society

Editor :

H. CHARNOCK

Vol. **94**, 1968

LONDON :
ROYAL METEOROLOGICAL SOCIETY
49 CROMWELL ROAD, LONDON, S.W.7
1968

CONTENTS OF VOLUME **94**

I. H. Bailey and W. C. Macklin—The surface configuration and internal structure of artificial hailstones .. ..

G. R. R. Benwell and M. S. Timpson—Further work with the Bushby-Timpson 10-level model .. ..

P. Roberts and J. Hallett—A laboratory study of the ice nucleating properties of some mineral particulates .. ..

C. M. Stevenson—An improved Millipore filter technique for measuring the concentrations of freezing nuclei in the atmosphere .. ..

A. S. Thom—The exchange of momentum, mass, and heat between an artificial leaf and the airflow in a wind-tunnel .. ..

C. M. Stevenson—An analysis of the chemical composition of rain-water and air over the British Isles and Eire for the years 1959-1964 .. ..

A. B. Fraser—The white box : the mean mechanics of the cumulus cycle .. ..

Shorter Contributions—

K. L. Calder—In clarification of the equations of shallow-layer thermal convection for a compressible fluid based on the Boussinesq approximation .. ..

I. H. Bailey and W. C. Macklin—Heat transfer from artificial hailstones.. ..

C. D. Rodgers—Some extensions and applications of the new random model for molecular band transmission .. ..

Correspondence—

A. Lloyd—Shear flow in wind tunnels 1

Discussions—

A. J. Dyer—The flux-gradient relation for turbulent heat transfer in the lower atmosphere (*Q.J.*, **91**, p. 151) 1

K. L. Calder—Concerning the similarity theory of A. S. Monin and A. M. Obukhov for the turbulent structure of the thermally stratified surface layer of the atmosphere (*Q.J.*, **92**, p. 141) 1

Proceedings at meetings of the Society 1

Reviews—

Traité de glaciologie, L. Lliboutry (G.M.); *The problem of water*, R. Furon (J.S.G. McC.); *Airborne microbes*, P. H. Gregory and J. L. Monteith (Ed.) (A.R.M.); *Journal of the Franklin Institute*, (C.D.S.); *Les paysans de Languedoc*, E. Le Roy Ladurie (D.J.S.); *Studies in Antarctic meteorology*, M. J. Rubin (Ed.) (H.L.) 1

Obituary Notices 1

Corrigenda 1

G. R. R. Benwell and F. P. Bretherton—A pressure oscillation in a 10-level atmospheric model 1

N. E. Busch and H. A. Panofsky—Recent spectra of atmospheric turbulence .. 1

J. C. Kaimal—The effect of vertical line averaging on the spectra of temperature and heat-flux 1

R. F. MacKinnon—Microbarographic oscillations produced by nuclear explosions as recorded in Great Britain and Eire 1

W. C. Macklin and G. S. Payne—Some aspects of the accretion process 1

J. C. Drake—Electrification accompanying the melting of ice particles 1

F. B. A. Giwa—Response curves in the theory of atmospheric oscillations 1

Shorter Contributions—

J. A. Businger and M. Miyake—Justification for neglecting the third moment in the steady state expression for the turbulent heat-flux near the ground 2

Correspondence—

W. L. Donn and N. K. Balachandran—On continuous noctural pressure fluctuations.. 2

J. D. Woods—On the formation of certain billow clouds 2

scussions—

J. C. Drake and B. J. Mason—The melting of small ice spheres and cones (*Q.J.*, **92**, p. 500) 211

P. M. Hamilton—Vertical profiles of total precipitation in shower situations (*Q.J.*, **92**, p. 346) 211

P. L. Kamburova and F. H. Ludlam—Rainfall evaporation in thunderstorm downdraughts (*Q.J.*, **92**, p. 510) 212

F. P. Bretherton—The propagation of groups of internal gravity waves in a shear (*Q.J.*, **92**, p. 466) 213

R. S. Lindzen—Thermally driven diurnal tide in the atmosphere (*Q.J.*, **93**, p. 18) .. 213

R. A. Hamilton and R. H. Collingbourne—A difficulty in the interpretation of certain solar radiation measurements (*Q.J.*, **93**, p. 186) 214

C. D. Rodgers—The use of emissivity in atmospheric radiation calculations (*Q.J.*, **93**, p. 43) 215

G. D. Robinson—Some determinations of atmospheric absorption by measurement of solar radiation from aircraft and at the surface (*Q.J.*, **92**, p. 263) 215

oceedings at meetings of the Society 216

views—

Aerology of the polar regions, S. S. Gaigerov (H.H.L.); *Libyen/Libya. Geomedical monograph series I*, H. Kanter (H.H.L.); *Viewing weather from space*, E. C. Barrett (I.J.W.P.); *A history of the thermometer and its uses in meteorology*, W. E. Knowles Middleton (A.L.M.); *Weather and agriculture*, J. A. Taylor (Ed.), (R.W.G.) 219

bituary Notices 222

. W. Platzman—The Rossby wave 225

. W. Brewer and A. W. Wilson—The regions of formation of atmospheric ozone .. 249

N. Kulkarni—Day and night measurements of ozone in the Southern Hemisphere 266

. Labitzke—Midwinter warming in the upper stratosphere in 1966 279

. K. Lilly—Models of cloud-topped mixed layers under a strong inversion .. 292

. O. Staley and G. M. Jurica—Radiative modification of selected vertical temperature distributions 310

. C. Chamberlain—Transport of gases to and from surfaces with bluff and wave-like roughness elements 318

. G. Vincent—Mean meridional circulation in the Northern Hemisphere lower stratosphere during 1964 and 1965 333

C. Chatwin—The dispersion of a puff of passive contaminant in the constant stress region 350

F. Bradley—A micrometeorological study of velocity profiles and surface drag in the region modified by a change in surface roughness 361

orter Contributions—

E. F. Bradley—A shearing stress meter for micrometeorological studies 380

G. W. Paltridge—Application of the technique of ionospheric drift analysis to the study of atmospheric turbulence.. 388

W. C. Macklin and I. H. Bailey—The collection efficiencies of hailstones 393

A. R. Rees—Solar radiation on the south coast of England 397

R. S. Lindzen—Rossby waves with negative equivalent depths – comments on a note by G. A. Corby 402

iscussions—

R. P. Wayne—The photochemical formation of electronically excited oxygen molecules in the atmosphere (*Q.J.*, **93**, p. 69) 408

E. B. Kraus and R. E. Morrison—Local interactions between the sea and the air at monthly and annual time scales (*Q.J.*, **92**, p. 114) 409

J. C. Kaimal and D. A. Haugen—Characteristics of vertical fluctuations observed on a 430-m tower (*Q.J.*, **93**, p. 305) 412

N. R. Watson—Some measurements of turbulence in altocumulus clouds (*Q.J.*, **93**, p. 227) 413

M. A. Abbas and J. Latham—An experimental investigation of the selective ion-capture theory of cloud electrification (*Q.J.*, **93**, p. 474).. 414

R. G. Barry—Variations in the content and flux of water-vapour over north-eastern North America during two winter seasons (*Q.J.*, **93**, p. 535) 415

J. Latham and C. D. Stow—A laboratory investigation of the electrification of snowstorms (*Q.J.*, **93**, p. 55).. 415

TABLE OF CONTENTS

Report of the Council for 1967 .. ..

Proceedings at meetings of the Society .. ..

Reviews—

Sydney Chapman, eighty, S. I. Akosofu, B. Foyle and B. Haurwitz (Ed.), (J.M.S.); *Physics of geomagnetic phenomena*, S. Matsushita and W. H. Campbell (Ed.) (C.O.H.); *An introduction to fluid dynamics*, G. K. Batchelor (R.J.M.); *Air pollution*, Volume 1, A. C. Stern (Ed.) (C.F.B.); *Allgemeine Klimageographie*, J. Blüthgen (H.H.L.); *Formation of precipitation and modification of hail processes*, G. K. Sulakvelidze, N. Sh. Bibilashviti and V. F. Lapcheva (S.G.C.) .. ..

Obituary Notices .. ..

F. K. Hare—The Arctic .. ..

W. C. Swinbank—A comparison between predictions of dimensional analysis for the constant-flux layer and observations in unstable conditions .. .. ..

D. A. Johnson and J. Hallett—Freezing and shattering of supercooled water drops ..

H. U. Dütsch—The photochemistry of stratospheric ozone .. .. ..

K. A. Browning, T. W. Harrold, A. J. Whyman and J. G. D. Beimers—Horizontal and vertical air motion and precipitation growth, within a shower .. ..

W. D. Scott and P. V. Hobbs—The spectra of charging events due to the collision of natural ice particles with an ice surface .. ..

I. R. Cowan—Mass, heat and momentum exchange between stands of plants and their atmospheric environment .. ..

A. J. Dyer and B. B. Hicks—Global spread of volcanic dust from the Bali eruption of 1963

W. Klug—Diffusion in the atmospheric surface layer : comparison of similarity theory with observations .. ..

A. B. Pittock—Seasonal and year-to-year ozone variations from soundings over South-Eastern Australia .. ..

Shorter Contributions—

P. H. Stone and D. J. Baker, Jr.—Concerning the existence of Taylor columns in atmospheres .. ..

H. A. Panofsky and E. Mares—Recent measurements of cospectra for heat-flux and stress .. ..

A. E. Gill—Similarity theory and geostrophic adjustment .. .. ..

J. S. Turner—The circulation driven by ring convection in a rotating system ..

P. Hyson—Windfinding data from radar tracking of high altitude sensors .. ..

Correspondence—

T. L. Ogden—Apparent point discharge at a clump of trees .. .. ..

Discussions—

W. T. Roach—On the nature of the summit areas of severe storms in Oklahoma (*Q.J.*, **93**, p. 318) .. ..

M. Grimmer and D. B. Shaw—Energy-preserving integrations of the primitive equations on the sphere (*Q.J.*, **93**, p. 337) .. ..

R. P. Pearce and P. W. White—Lee wave characteristics derived from a three-layer model (*Q.J.*, **93**, p. 155) .. ..

R. E. Newell, J. R. Mahoney and R. W. Lenhard, Jr.—A pilot study of small-scale wind variations in the stratosphere and mesosphere (*Q.J.*, **92**, p. 41) ..

Proceedings at meetings of the Society .. ..

Reviews—

Kinetics of phase transitions of water in the atmosphere, L. G. Kachurin and V. G. Morachevskii (J.H.); *Theory of fog condensation*, A. G. Amelin (J.T.B.); *Atmosphere, weather and climate*, R. G. Barry and R. J. Chorley (D.M.H.); *The story of Jodrell Bank*, B. Lovell (R.F.); *Air pollution*, A. C. Stern (Ed.) (C.F.B.) .. .. ..
